

Dear FCCI do not want the "Broadcast Flag" to be passed into law.
This violates my rights as a citizen to view TV programs that I have recorded
for my own use.
Furthermore, I resent the fact that the government is interfering with free use
of our home computers by the insertion of a bug "spy" which would censor what I
have in my home PC.
Both of these are xamples of unfair censorship and government interfernce and
control. I do not want to support either of these programs.
Thank you.
James Li
